

a coesia company

After the great success of Drupa 2016, EMMECI aims at replicating it with its participation at Interpack 2017, where the MC2016 APP Line will be demonstrated. The MC2016 APP Line is a concentration of innovation and it is the result of the study and experience of our R&D department. The revolutionary technological innovations of this Line, such as the use of HD-system cameras for the spotting, make it possible to keep high accuracy and precision levels during the whole production process, thus guaranteeing constantly high performances and the production of high-quality and excellent aesthetic finished boxes.

EMMECI's offer is the result of the continuous evolution and constant research of our R&D Department and it includes the state-of-the-art of technology for the production of 'premium packaging' for the different sectors of the market. Such innovations are the expression of the industrial revolution which is taking place also in the world of packaging and which is leading to a more and more massive 'digitalization' as a mean to increase the efficiency of the production processes.

EMMECI will be exhibiting inside the area of the COESIA Group (Hall 6/ booths, D31/D57/E31/E57). From 1st July 2016 EMMECI is actually part of COESIA which is a group of innovation-based industrial solutions and packaging companies operating globally, headquartered in Bologna (Italy).

Visit us at **Interpack 2017 (4 – 10 May 2017)** at **Messe Duesseldorf, Hall 6, Booth D57.**
